

# URBAN TECH WORKFORCE PROGRAM 2.0

## Supporting rising technical professionals in Atlanta

The Urban League of Greater Atlanta has promoted civil rights and economic empowerment since we opened our doors in 1920. In this, our centennial year, we continue to focus on education and job skills training and employment as a means of building economic security in communities of color. To that end, the ULGA launched the Urban Tech Workforce Program to educate, certify, and develop graduates for high demand, high-income technology jobs, and careers. Our 11-week Robotics Process Automation (RPA) Design and Development program includes technology theory, practical applications, professional development, financial literacy, and job placement assistance.

There are many ways your company, or individual staff, can support this program. Your commitment will empower communities, strengthen the area's workforce, change the lives of participants and their families, and build a dynamic talent pipeline for your organization.

## Ways you can support the program:

- PROVIDE OPPORTUNITIES FOR OUR GRADUATES**  
Our graduates will be excellent candidates for internships, contract staffing, or full-time employment as junior analysts, developers, project coordinators, and many other roles. Help increase the pool of top talent here and welcome skilled professionals in your organization.
- VOLUNTEER TO TEACH**  
We have a rigorous curriculum from UiPath, but we need RPA professionals willing to spend some time in front of the class presenting course materials and preparing students for their certification exam.
- LEAD WORKSHOPS**  
Our professional development package includes the essential skills students will need to thrive in a corporate environment. We need leaders to share stories, conduct workshops, judge projects, and mentor students to help shape tomorrow's dynamic workforce.
- DONATE**  
We need funding to expand the number of students served and to help them succeed. Often, our talented clients need stipends for transportation, professional attire for interviews and work settings, prizes for competitions, and other items to remove barriers and promote motivation.
